Quanex®

Spaces

GARDEN ROOMS

Spaces are built to the highest standards, offering exceptional quality and durability.

NOW FEATURING:

LOWER THRESHOLDS
for extra head clearance.

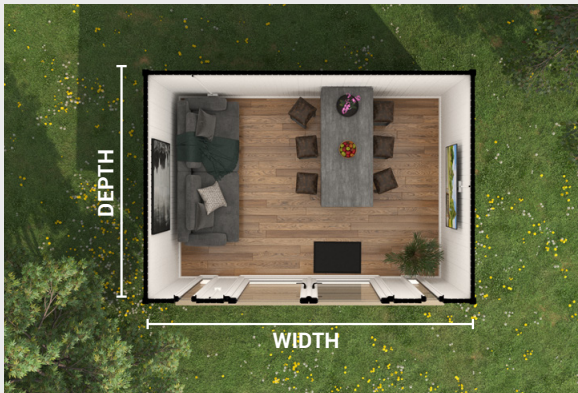

PATENTED PANEL CLIPS
enhance structural integrity.

CONCEALED SUPPORTS
for bi-fold doors.

HEIGHT & WIDTH

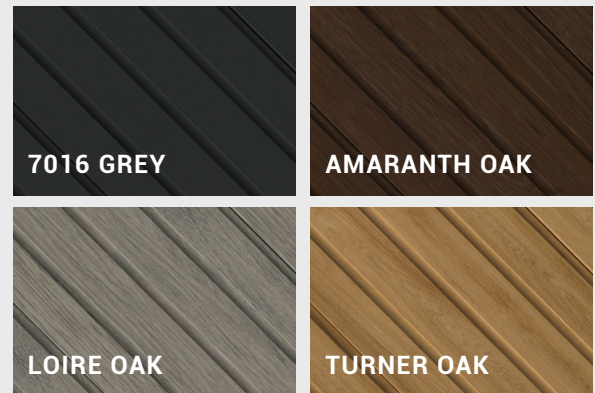

Spaces are made using 0.3m wide, vertically aligned wall panels. This means width and depth adjustments come in 0.3m increments.

For example, a room with a width of 3.2m (which includes 100mm frame protrusion each side) can't be increased to 3.3m - the next size up would be 3.5m. The maximum width is 5.9m and the maximum depth is 4.4m.

WALLS & CEILING

Choose from four attractive finishes for your Space's foiled external wall panels.

Enhance the internal space with sleek matt white PVCu ceiling panels, offering a stylish finish while eliminating the hassle of painting.

Please note these colours are external only, internal panel colour is white. All other external components are supplied in black.

MORE RANGE. MORE POTENTIAL. MORE CUSTOMERS.
